California State Controller's Office

County Budget Guide

Foreword

California Government Code (GC) §29002, (GC) §30200, and (GC) §53065 require the State Controller to prescribe uniform accounting procedures for counties, dependent special districts and other agencies under the supervision and control of the county board of supervisors. In compliance with this section, the *County Budget Manual* was issued in 1986. Although the *County Budget Act* (the “Act”) has been amended from time to time, there had not been a comprehensive review of the Act or a revision of the County Budget Manual since 1986.

The *Act*, (GC) §29000 – 29144 and (GC) §30200, was amended in the fall of 2009. A copy of the *Act* is attached as Appendix B. The task of updating the manual to reflect the changes was a cooperative effort of representatives from the State Controller’s Office, County Auditor-Controllers, and County Administrative Officers. The result of these efforts is a *County Budget Guide* (the “*Guide*”) that provides current information to assist counties in the preparation of the annual Adopted Budget and reflects applicable GASB pronouncements up to and including GASB Statement No. 54 (GASB 54). A cross-reference of the revisions to the county budget schedules is presented in Appendix A.

In 2009, the Governmental Accounting Standards Board (GASB) issued Statement No. 54, Fund Balance Reporting and Governmental Fund Type Definitions. The new standard substantially changed the categories and terminology used to describe the components of fund balance. Amendments were made to the *Guide* by replacing fund balance terminology formerly known as reserves and designations with the new GASB 54 terminology. Although the *Guide* continues to make reference to General Reserves, they are required to be included within the framework of GASB 54 terminology (see Govt. Code Section 29085).

Prior to GASB 54, the primary focus of fund balance was to determine whether its components were available or unavailable to finance the budget. GASB 54 redefined fund balance components by focusing on the restrictions and constraints associated with the sources of fund balance. GASB 54 was designed to ensure uniformity and comparability among governments for purposes of financial reporting. However, it was not designed to be compatible with the legal framework under which budgets are adopted and monitored. Therefore, the *Guide* provides the necessary flexibility to ensure that the budget schedules most accurately display and identify the amounts available for appropriation in each budgeted fund. For this reason, certain schedules displayed in the budget may not be consistent with the financial statement presentation requirements of GASB 54.

The Basic Budget Formula

2.00

County Budget Formula

The basic budget formula is applicable to counties, dependent special districts and other agencies under the supervision and control of the board of supervisors. (GC) §29009 requires the adopted budget to be in balance; therefore, Total Financing Sources shall equal Total Financing Uses.

County Budget Guide

2

General Provisions

- 2.01 Scope**
The county budget includes the operations of the governmental and proprietary funds of the county, dependent special districts and other agencies whose affairs and finances are under the supervision and control of the board of supervisors.
- 2.02 Obligated Fund Balances**
All amounts that are unavailable for financing budgetary requirements in the budget year. This would include nonspendable, restricted, committed, and assigned fund balances.
- 2.03 Financing Uses**
Appropriations are authorizations for the county to make expenditures and to incur obligations during the current fiscal year. Financing sources, for which there are no appropriations, are termed provisions. The sum of appropriations and provisions is the total financing (budgetary) uses. (GC) §29009 requires the final adopted budget to be in balance; therefore, Total Financing Sources shall equal Total Financing Uses.
- 2.04 Appropriations Classification**
Appropriations are classified by:
Object
Budget Unit
Activity
Function
Fund
- Each budget unit is classified by function and activity within each fund. Budget units shall not include more than one activity. Each activity must be segregated for budget presentation and financial reporting.
- 2.05 Budget Unit Detail**
Appropriations within each budget unit are segregated by the following objects and sub-objects:
Salaries & Employee Benefits
Services & Supplies
Other Charges
Capital Assets
Land
Structures & Improvements
Equipment
Infrastructure
Intangible Assets
Other Financing Uses
Intrafund Transfers*
Transfers-Out
- Within the object of capital assets, the subobject presentation is required as specified in Section 2.12. Appropriations for contingencies shall be shown in a separate budget unit, see section 2.16.

* Please refer to section 2.15 for optional procedures for intrafund transfers.

County Budget Guide

2

- b. Other financing uses by budget unit.
- c. Intrafund transfers by budget unit.
- d. Transfers-out by fund.
- e. Appropriations for contingencies, by fund.
- f. Provision for obligated fund balances, by fund and purpose.
- g. Means of financing the budget requirements.

2.07 Additional Financing Sources

Includes revenues, other financing sources and Transfers-in. Schedule 5 presents a summary of additional financing sources by source and fund while Schedule 6 provides a detailed presentation by fund and account.

2.08 County Budget Forms

The forms prescribed by the State Controller for presentation of the county budget are:

Financing Uses Detail

2.09 Salaries & Employee Benefits

Appropriations are made in terms of total salaries before payroll deductions. Appropriations for salaries and wages of permanent and nonpermanent positions may be given in totals within each budget unit, provided the estimates for salaries and wages of permanent positions are supported by a schedule or a separate ordinance or resolution setting forth for each position classification the salary rate or range and number of positions recommended and approved.

2.10 Services & Supplies

This object contains the various subobject accounts to accumulate all the expenditure detail desired for informational or statistical purposes, and it still permits ready consolidation in the prescribed account form for reporting purposes to the State Controller.

2.11 Other Charges

This object contains subobject accounts that do not fit the definition of the other reporting objects. Reference Accounting Standards and Procedures for Counties, Chapter 7.

2.12 Capital Assets

At a minimum, the capital asset object must show the estimate for the subobjects as follows:

1. Land shall be reported in total amounts, except when included as a component of a project.
2. Structures and improvements shall be reported separately for each project, except minor improvement projects may be reported in totals.
3. Equipment shall be reported in total amounts by budget unit.
4. Infrastructure shall be reported in total amounts by budget unit.
5. Intangible assets may be reported in total amounts by budget unit.

2.13 Other Financing Uses

This object shall include operating transfers-out. Operating transfers are interfund transfers from a fund receiving the revenue to the fund that will expend the resources. Examples are a subsidy from the general fund to a proprietary fund or a tax revenue transfer from a special revenue fund to a debt service fund. Operating transfers shall be shown in the budget unit on Schedule 9.

2.14 Transfers-Out

Transfers-out are nonrecurring transfers of equity from one fund to another fund. These transfers will be shown on Schedule 9.

2.15 Intrafund Transfers

Intrafund transfers are optional transfers of costs between budget units in the same governmental type fund. This transfer distributes costs to various departments for budgeting and informal operating statement purposes. This transfer shall be shown as Intrafund Transfers-In and/or Intrafund Transfers-Out under expenditures and other operating uses (an increase for the receiving budget unit, a decrease for the servicing unit).

County Budget Guide

2

Financing Uses Detail (Cont.)

2.15 Intrafund Transfers (Cont.)

Sub accounts may be utilized if desired. An alternative to this method would be as a decrease of a single amount in expenditures (Intrafund Transfers) for the servicing unit and an increase in each appropriate expenditure account of the receiving unit. The first alternative is recommended over the second alternative.

2.16 Appropriations for Contingencies

The budget may include an appropriation within each fund for contingencies, or within a separate contingency fund, or in the General Fund, in such amounts as the board deems sufficient. These amounts are appropriated through the budget adoption process. However, to make the appropriations specific and to authorize expenditures against them, a four-fifths vote of the board is required. Whether in a separate fund or within a fund, all contingencies appropriations are collected in a separate budget unit. If appropriations for contingencies are accounted for in a separate fund, the financing fund for each appropriation shall be specified.

Dependent special districts and other agencies under the supervision and control of the Board of Supervisors may include an appropriation for contingencies. The appropriation is shown as a line item of the operating budget on Schedule 15.

Funds

2.17 County Budget Application

The county budget presents county operations using governmental and proprietary funds. Governmental funds include the following: general, special revenue, debt service, capital projects and permanent funds, while the proprietary funds include the internal service and enterprise funds. Refer to the Accounting Standards and Procedures for Counties Manual for proper use and identification of funds.

2.18 Internal Service Funds

Schedule 10 is provided for presentation of the operating plan of an internal service fund, including anticipated income, expenses and net gain or loss. In addition, an Estimated Statement of Changes in Financial Position or an Estimated Statement of Changes in Retained Earnings may be presented.

2.19 Enterprise Funds

A budget for each enterprise fund must be included on a separate Schedule 11. Schedule 11 presents revenue and expenses following the accounts prescribed for the activity in which the enterprise is engaged. In addition, an Estimated Statement of Changes in Financial Position or an Estimated Statement of Changes in Retained Earnings may be presented.

It should be noted budget forms have not been prescribed for enterprise special districts under the supervision and control of the board of supervisors. However, at individual county discretion, the format for county budget schedules 10 and 11 may be used to present the managerial budget of "board governed" enterprise special districts. If this option is exercised, the schedules should immediately follow the "board governed" non-enterprise special district budget schedules.

County Budget Guide

2

Special Procedures

2.20 Provisions for Obligated Fund Balances

Provisions result in increases in nonspendable, restricted, committed and assigned fund balances. They are detailed in Schedule 4. Typical provisions include general reserve, capital outlay obligations, inventories, and advances to internal service funds. It is recommended, obligated balances not be cancelled at the end of each year, and the provision be in the amount of the increase only.

2.21 Reductions to Obligated Fund Balances

Reductions of obligated fund balances releases resources to finance the current budget requirements. Cancellation of a prior obligation is added to ending fund balance as presented on Schedule 2. Reductions in obligations are shown on Schedule 4.

2.22 Interfund Transactions

Interfund Transactions are revenue and expenditure/expense transactions when considering individual funds but are not revenues and expenditures/expenses of the governmental unit taken as a whole. The prescribed treatment balances the need for treating each fund as an independent organization and reducing the revenue and expenditure/expense pyramiding when considering a governmental unit's funds in the aggregate. Interfund Transactions are divided into two classifications:

- Reciprocal
- Nonreciprocal

Section 8.20 of the *Accounting Standards and Procedures for Counties* provides definitions and examples of the proper budgetary treatment of each type of transaction. Special Districts and Other Agencies required to be included in the county budget should follow the same treatment discussed in this section.

Road Programs

2.23 Road Programs

Subject to the requirements for centralizing structures and improvements and contingency appropriations (2 CCR § 994), the road program is presented in the budget unit for the Road or Public Works Department presented in Schedule 9 of the budget. When road construction is involved, an additional "Work Program Statement" is required to be included in the budget and should be presented immediately following the correlating Road Fund, Schedule 9. In lieu of presenting by subobjects, the Work Program Statement shall present the total of the objects detailed by cost center, and by project and should agree with the Schedule 9, Financing Uses Total. Additional guidance is available in the Road Fund Accounting chapter, Appendix 9A of the *Accounting Standards and Procedures for Counties* manual.

In addition to, and in similar manner as prescribed for the estimates of expenditures classified by objects of expenditure, the official or person in charge of the roads function of the county shall also file a supporting statement setting forth the proposed work program for the year for which the budget is to apply. The proposed work program shall be construed to be the prescribed alternate procedure in lieu of the subobjects of expenditure as referred to in Section 965, Article 2 of Subchapter 2, Budgeting Procedures for Counties, and shall be arranged to set forth the data, as applicable in terms of the major operational classifications, namely:

- | | |
|--|---------------------------------------|
| (1) Administration | (6) Plant Acquisition |
| (2) Construction | (7) Reimbursable Work |
| (3) Maintenance | (8) Cost Transfers and Reimbursements |
| (4) Aid to Other Governmental Agencies | |
| (5) Acquisition of Equipment | |

The Construction and the Plant Acquisition classifications shall be itemized by appropriately identified projects with estimated costs thereof, except that minor betterment projects in each classification may be grouped and shown in lump-sum amounts. Any of the other classifications may be further classified by such sub-activities or itemization as is deemed desirable or necessary for administrative control purposes.

The work program statement shall be subject to the same procedures of review and revision as other estimates but need not be formally adopted by the board. It shall be included in the budget document as a supporting statement to the official budget estimates classified by objects of expenditures. It shall be subject to such administrative controls as deemed necessary and appropriate by the board.

County Budget Guide

Chapter 3

Schedules and Instructions

Pursuant to the provisions of the County Budget Act, the State Controller has prescribed the following forms required to be used in the presentation of the annual adopted county budget, and budgets for those dependent special districts and other agencies that are required to be included in the budget document per (GC) §29002.

In 2009, the Governmental Accounting Standards Board (GASB) issued Statement No. 54, Fund Balance Reporting and Governmental Fund Type Definitions. The new standard substantially changed the categories and terminology used to describe the components of fund balance. Amendments were made to the *County Budget Guide* (the “*Guide*”) by replacing fund balance terminology formerly known as reserves and designations with the new GASB 54 terminology. Although the *Guide* continues to make reference to General Reserves, they are required to be included within the framework of GASB 54 terminology (see Govt. Code Section 29085).

Prior to GASB 54, the primary focus of fund balance was to determine whether its components were available or unavailable to finance the budget. GASB 54 redefined fund balance components by focusing on the restrictions and constraints associated with the sources of fund balance. GASB 54 was designed to ensure uniformity and comparability among governments for purposes of financial reporting. However, it was not designed to be compatible with the legal framework under which budgets are adopted and monitored. Therefore, the *Guide* provides the necessary flexibility to ensure that the budget schedules most accurately display and identify the amounts available for appropriation in each budgeted fund. For this reason, certain schedules displayed in the budget may not be consistent with the financial statement presentation requirements of GASB 54.

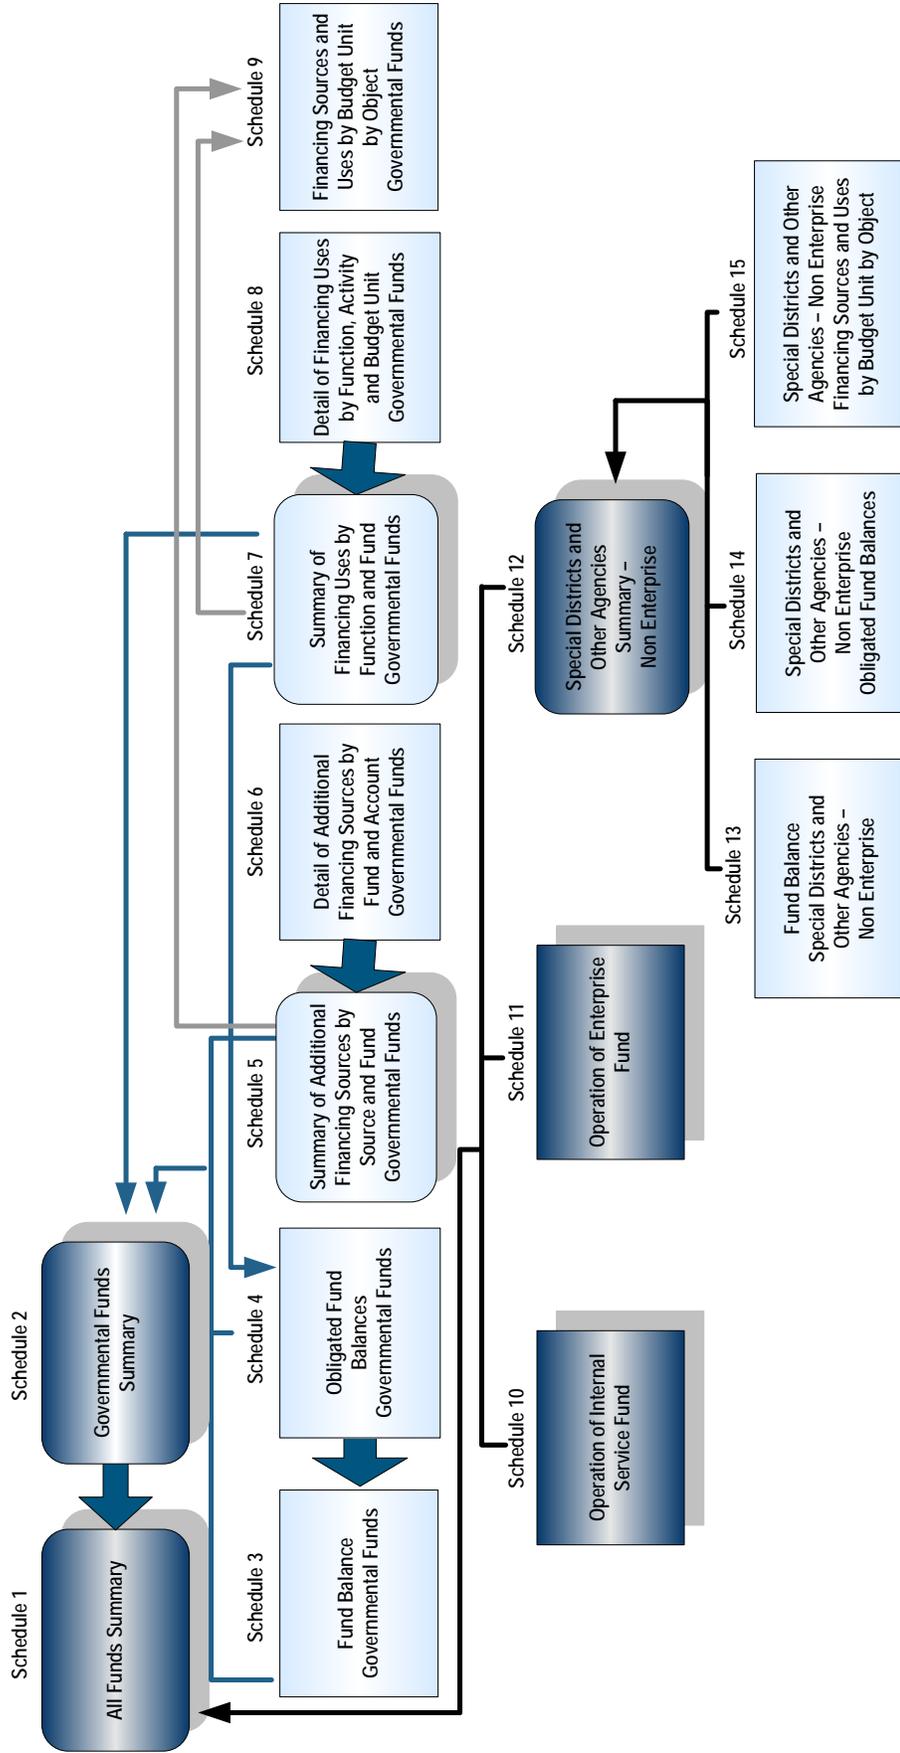

These forms may be useful in the preparation of the recommended budget, but are required only in the adopted budget.

The majority of the forms contain heading blocks in the columns to be completed to indicate the basis or source of the data entered in the several columns. These terms are defined as follows:

“Actual”	Means recorded in official financial system with no estimated amounts entered in the column.
“Estimated”	Means an amount that is a projected total of what the actual will be by the end of the fiscal year.
“Recommended”	Means recommended by the administrative officer or the auditor of the county.

Schedule 3

Fund Balance – Governmental Funds

This schedule presents the various components of actual or estimated fund balance. Encumbrances, nonspendable, restricted, committed, and assigned fund balances are subtracted from actual or estimated total fund balance to determine the amount of fund balance that is available as of June 30 of the preceding budget year, and for current budgetary requirements.

The equation for Schedule 3 is:

$$\text{Column 2} - 3 - 4 - 5 = 6$$

The effect of increases and decreases to nonspendable, restricted, committed and assigned fund balances are included in Schedules 2 and 4, not in Schedule 3.

Column 1 – Fund Name

List all County governmental funds with actual or estimated fund balance at June 30, including those which may not have any Financing Sources or Financing Uses in Schedule 2. The sequence the funds are listed should be consistent with their presentation in Schedules 2, 4 and 5.

Column 2 – Total Fund Balance June 30, 20XX

Present the total fund balance for each fund as of June 30 of the preceding budget year.

Column 3 – Encumbrances

When a county uses the encumbrance accounting approach, encumbrance amounts should be reported in column 3 only to prevent double reporting. Columns 4 and 5 should not include encumbrance amounts when reporting encumbrances in column 3.

Column 4 – Nonspendable, Restricted, and Committed

Present the total of all nonspendable, restricted and committed fund balances as of June 30 of the preceding budget year, treated either as an account within a fund or a separate fund. The total of the nonspendable, restricted and committed fund balances in Column 4 and the assigned fund balance in Column 5 must agree with corresponding totals by fund in Schedule 4, Column 2.

Column 5 – Assigned

Present the total of all assigned fund balance as of June 30 of the preceding budget year, treated either as an account within a fund or a separate fund. The total of the nonspendable, restricted and committed fund balances in Column 4 and the assigned fund balance in Column 5 must agree with corresponding totals by fund in Schedule 4, Column 2.

Column 6 – Fund Balance Available June 30, 20XX

Schedule 10

Operation of Internal Service Fund

This schedule is prepared for all Internal Service Funds as defined in Chapter 13 of Accounting Standards and Procedures for Counties. The schedule meets the requirements of (GC) §29141.

This schedule discloses the managerial budget of each internal service activity financed by a proprietary fund established pursuant to the provisions of (GC) §25260 and (GC) §25261. The schedule shall set forth expected operations of the activity in such detail for revenues and expenses as will adequately display the nature and approximate size of its operations. Comparative data as prescribed in (GC) §29006 shall be provided. Refer to Chapter 2, Section 2.19 for special district and other agencies enterprise/internal service fund reporting options.

Chapter 13 of the Accounting Standards and Procedures for Counties defines the criteria for accounting and budgeting for proprietary type funds. The preparer should be familiar with that chapter and refer to it for complete illustrations.

Proprietary funds consist of internal service funds and enterprise funds, which are used to account for government's business-type activities, and as such follow similar measurement focus and basis of accounting as those used for private business enterprises, not-for-profit organizations and government-wide financial statements. Some of the accounting and reporting differences between proprietary funds and governmental funds are:

1. Accrual basis of accounting instead of modified accrual basis of accounting. In accrual basis of accounting, revenues are recognized when earned and expenses are recognized when incurred.
2. Capitalization and depreciation of capital assets.
3. Economic resources measurement focus instead of current financial resources measurement focus, where it considers the "near term" availability of financial resources.
4. The optional use of budgetary accounts.
5. Reporting of long-term liabilities in a proprietary fund if they are directly related to and are expected to be paid from the fund.

Major differences between internal service funds and enterprise funds are as follows:

1. Internal service funds predominantly provide services within the primary government, while enterprise funds predominantly provide services external to the primary government.
2. Internal service funds operate as cost-reimbursement mechanisms and as such are expected to recover the full cost of providing a given service over time, while enterprise funds are permitted to recover the cost fully or partially.

As a minimum, the schedule will reflect the information listed below; additional levels of detail may be provided at local option.

Include amounts in each column for all operating revenues. Revenues are classified according to the nature of the activity being reported and parallel those used by commercial enterprises in performing similar activity. Operating revenues for an internal service fund include all revenues earned as a result of conducting the normal operations of the fund. Revenues are reported and estimated using the accrual method of accounting. A total of all operating revenues should be presented. Column 5 Total operating revenues are included with total non-operating revenues and brought forward to Schedule 1, Column 4.

Operating Expenses

Present amounts in each column for each object of operating expenses. By definition, this category includes all those expenses associated with operating the internal service fund. They are reported using the accrual method of accounting. A total for all operating expenses should be presented. Operating Income (Loss)

In each column, enter the difference between Operating Revenues and Operating Expenses. Operating loss should be presented in brackets.

Non-Operating Revenues and (Expenses)

For each column, list the non-operating components of revenues and expenses. Enter expenses as negative amounts. Typical items included are gain and loss on disposal of capital assets, interest and investment income and expenses, and judgments or damages.

Total and present all non-operating revenues and non-operating (expenses) separately. Column 5 Non-operating revenues are included with operating revenues and brought forward to Schedule 1, Column 4. Column 5 Non-operating (Expenses) are included with operating expenses and brought forward to Schedule 1, Column 6.

Income before Capital Contributions and Transfers

In each column, enter the difference between Operating Income/(Loss) and the Total Non-Operating Revenues/(Expenses), followed by capital contributions, transfers-in, and (transfers-out).

The decrease in net assets is presented in brackets. An increase in Column 5 Net Assets is brought forward to Schedule 1, Column 7, and a decrease in Column 5 Net Assets is brought forward to Schedule 1, Column 3.

Capital Assets

Capital asset acquisitions, if any, for the budget year are to be presented as a memo item following the calculation of the change in net assets.

Schedule 13

Fund Balance - Special Districts and Other Agencies – Non Enterprise

This schedule discloses the various components of actual or estimated fund balance. Encumbrances, nonspendable, restricted, committed, and assigned fund balances are subtracted from actual or estimated total fund balance to determine the amount of fund balance that is available as of June 30 of the preceding budget year, and therefore available for current budgetary requirements.

The equation for Schedule 13 is:

$$\text{Column 2} - 3 - 4 - 5 = 6$$

The effect of increases and decreases to nonspendable, restricted, committed, and assigned fund balances are included in Schedules 12 and 14, not in Schedule 13.

Column 1 – District/Agency Name

List the name of the district/agency funds with actual or estimated fund balance at June 30, including those that may not have any Financing Sources or Financing Uses in Schedule 12. The listed sequence should be consistent with their presentation in Schedules 12 and 14.

Column 2 – Total Fund Balance June 30, 20XX

Present the total fund balance for each fund as of June 30 of the preceding budget year.

Column 3 – Encumbrances

For those counties who use the encumbrance accounting approach, present the amount of the fund balance reserved to meet outstanding purchase orders, contracts or other written commitments as of June 30 of the preceding budget year. When a county uses the encumbrance accounting approach, encumbrance amounts should be reported in column 3 only to prevent double reporting. Columns 4 and 5 should not include encumbrance amounts when reporting encumbrances in column 3.

Column 4 – Nonspendable, Restricted, and Committed Fund Balances

Present the total of all reserves as of June 30 of preceding budget year, treated either as an account within a fund or a separate fund. The total of the nonspendable, restricted, and committed fund balances in Column 4 and the assigned fund balance in Column 5 must agree with corresponding totals by fund in Schedule 14, Column 2.

Column 5 – Assigned Fund Balance

Present the total of all assigned fund balance as of June 30 of the preceding budget year, treated either as an account within a fund or a separate fund. The total of the nonspendable, restricted, and committed fund balances in Column 4 and the assigned fund balance in Column 5 must agree with corresponding totals by fund in Schedule 14, Column 2.

Column 6 – Fund Balance Available June 30, 20XX

Presents the total fund balance available to finance current budgetary requirements. The amounts are forwarded to Schedule 12, Column 2.

Each rate shall be such as will produce the amount determined as necessary to be raised by taxation on the secured roll after due allowance for delinquency, anticipated changes to the roll, disputed tax revenues anticipated to be impounded pursuant to (GC) §26906.1, amounts subject to the Community Redevelopment Law (Part 1 (commencing with Section 3300) of Division 24 of the Health and Safety Code), and other available financing sources. - (b) For purposes of this section, “an amount appropriate for necessary reserves” shall be limited to an amount sufficient to accommodate the county’s anticipated annual cash-flow needs for servicing the county’s voter-approved debt. The funds reserved may service only the debt for which the extraordinary rate is levied.
